PROFESSIONAL SUMMARY

Senior Front-End Developer with **5+ years** delivering production-grade interfaces across government portals, enterprise SaaS, e-commerce, and EdTech. Deep expertise in **Vue.js / Nuxt.js**, with strong working knowledge of **React, Angular, and TypeScript**. Architected a 500+ component design system, led a platform-wide Vue 2 → Vue 3 migration, and shipped real-time applications serving millions of users. I treat every project as a business problem first — comfortable owning the full front-end lifecycle from architecture to production on any modern JavaScript stack.

TECHNICAL SKILLS

Frameworks & Libraries	Vue.js (Expert) · Nuxt.js · React · Angular · Composition API · Pinia · Vue Router
Languages	JavaScript (ES6+) · TypeScript · HTML5 · CSS3
Styling	Tailwind CSS · SCSS / SASS · CSS Modules · HeadlessUI · Bootstrap · Responsive Design
Architecture	Design Systems · Component-Based Development · SPA · SSR · Storybook · Accessibility (WCAG)
APIs & Real-Time	REST · GraphQL · WebSocket · Socket.io · JWT · OAuth2
Build & DevOps	Vite · Webpack · Git · GitHub Actions · CI/CD · Vercel · Node.js / Express
Testing & Performance	Vitest · Chrome DevTools · Lighthouse · Core Web Vitals
AI-Assisted Dev	Claude Code · Cursor · GitHub Copilot · MCP Servers · Prompt Engineering

PROFESSIONAL EXPERIENCE

Senior Front-End Developer 2023 — Present

42 Group — Agenda Enterprise Platform

- Architected a **500+ component design system** from scratch, achieving 100% UI consistency across 4 product lines.
- Led a platform-wide **Vue 2 → Vue 3 migration** — **35% smaller bundles** and **2× faster initial load**.
- Built a real-time data layer with Socket.io, reducing dashboard latency by **40%**.
- Mentored 3 junior developers; established PR review standards and front-end coding guidelines.
- Acted as Product Owner for two sprints, translating stakeholder goals into technical roadmaps.

Front-End Developer 2022 — 2024

Mnjz — Naqde POS System

- Built the Naqde POS front-end from zero to production — used daily by **200+ merchants**.
- Migrated a legacy jQuery codebase to Vue.js; bug reports dropped **60%** within two releases.
- Implemented offline-first architecture with service workers for uninterrupted checkout.
- Achieved **50% page-load improvement** through code splitting and lazy-loaded routes.

Front-End Developer

Awwamer Alshabaka

- Delivered **8+ client projects** (dashboards, landing pages, portals) as lead front-end developer.
- Introduced Vue.js as the team standard, replacing jQuery — **40% faster delivery cycles**.
- Built a shared component library used across 5 concurrent client projects.

KEY PROJECTS & DELIVERABLES

Hajj & Umrah Portal — Ministry of Hajj & Umrah

High-traffic government portal serving millions globally with full RTL/LTR and i18n support.

Vue.js · i18n · Responsive

Tafweej — Crowd Management Dashboard — Ministry of Hajj & Umrah

Real-time operational dashboard with live maps, density heatmaps, and alerting.

Vue.js · WebSocket · Maps

Tashrif — Seasonal Recruitment Platform — Ministry of Hajj & Umrah

Bilingual job-matching platform with employer/worker dashboards and geo-targeted listings.

Vue.js · TypeScript · RTL/LTR

Imtithal — Compliance Platform — Ministry of Hajj & Umrah

Multi-module government system: citizen portal, admin panel, GIS layers, public landing page.

Vue.js · Maps

Agenda — Enterprise Platform — 42 Group

Entity-management SaaS with 500+ components, custom design system, real-time data layer.

Vue 3 · Pinia · Socket.io

Obayh / Saven / Jute — Fashion E-Commerce

End-to-end marketplaces with RTL, multilingual support, wishlist, advanced filtering.

Vue.js · Nuxt 3 · REST APIs

neolt — Virtual Classroom — EdTech Startup

Live video, shared whiteboard, real-time chat, admin curriculum management.

Vue.js · Socket.io

Urban Observatory — Civic Tech Dashboard

City-development monitoring with interactive charts, geospatial overlays, exportable reports.

JavaScript · Data Viz

QUANTIFIED IMPACT

- **40%** latency reduction — real-time dashboard optimization (Socket.io + Vue 3)
- **35%** bundle size cut — Vue 2 → Vue 3 enterprise migration
- **60%** fewer bug reports — after jQuery → Vue.js rewrite at Mnjz
- **50%** page-load improvement — code splitting and lazy loading
- **200+** daily active merchants — POS system built from zero to production
- **Millions** of users served — government Hajj & Umrah portals
- **30%** faster delivery cycles — internal design system adoption across teams

LANGUAGES

Arabic — Native | **English** — Professional (reading, writing, technical documentation)
